

CaseWare SmartSync

# Collaboration Goals

- Accessing centralized files
- Staff working from various locations
- Size of client files
- Performance
  - ❖ Low Bandwidth
- Cost

# Caseware SmartSync

SmartSync is a file synchronization system that can support several people working together on a Working Papers client file simultaneously.

SmartSync enables a team to work independently on the entire client file while providing each online member with instant updates on work completed by other members.

# Collaboration

## Previously

- Sign-out /sign-in
- Check-out /check-in

## Now

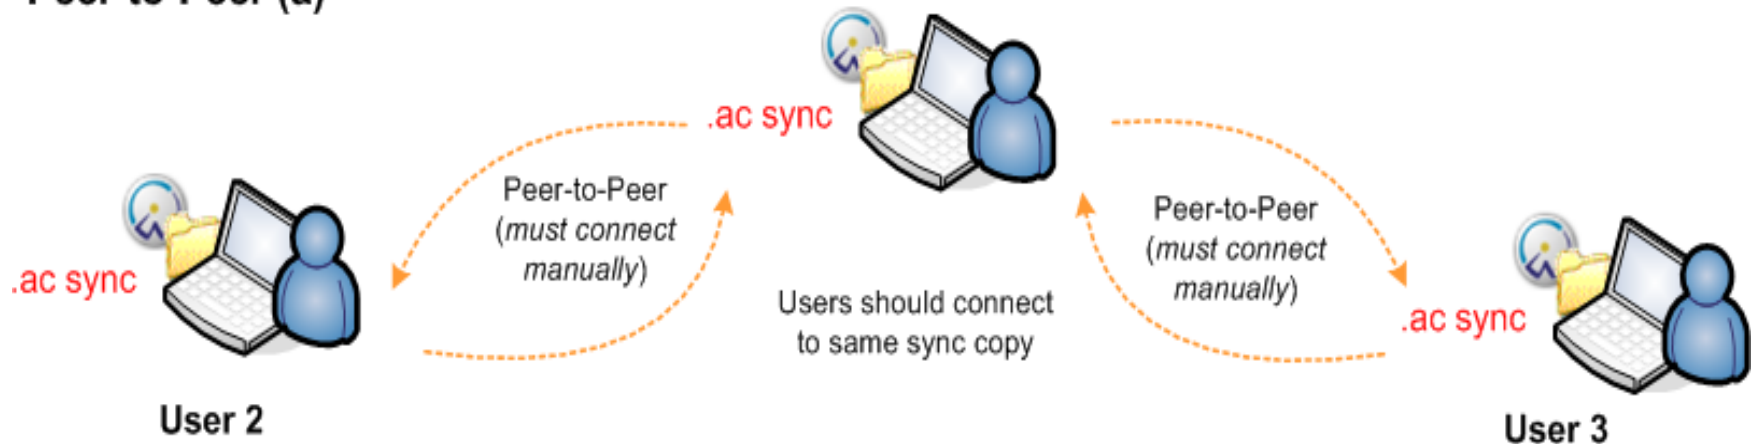

- Smartsync Add-on
  - ❖ VPN/File Share
- SmartSync server
  - ❖ VPN/HTTPS

# CaseWare SmartSync

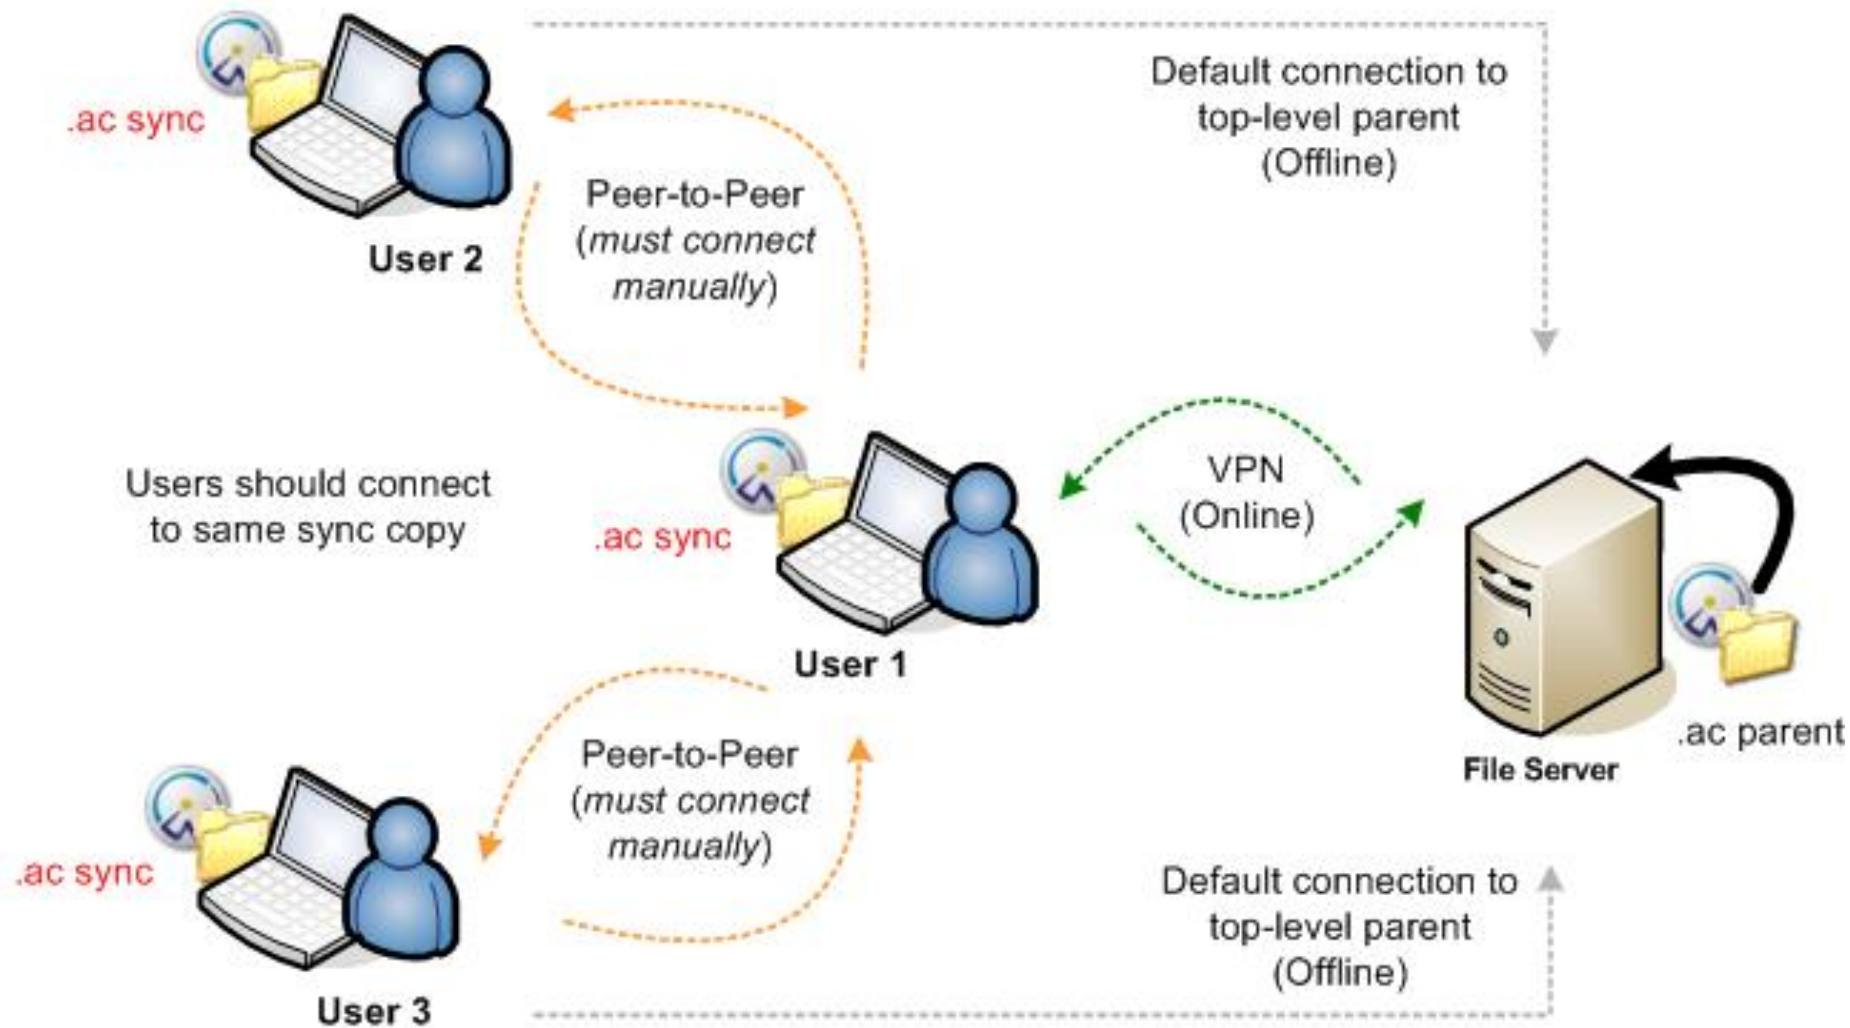

- Collaboration model based on synchronizing file changes
- Users work on their copy of the file and share changes with another
- All synchronization is done in the background
- Conflicts can be resolved automatically or by the end-user
