

## Procedures

### CMS Systems Solutions Ltd

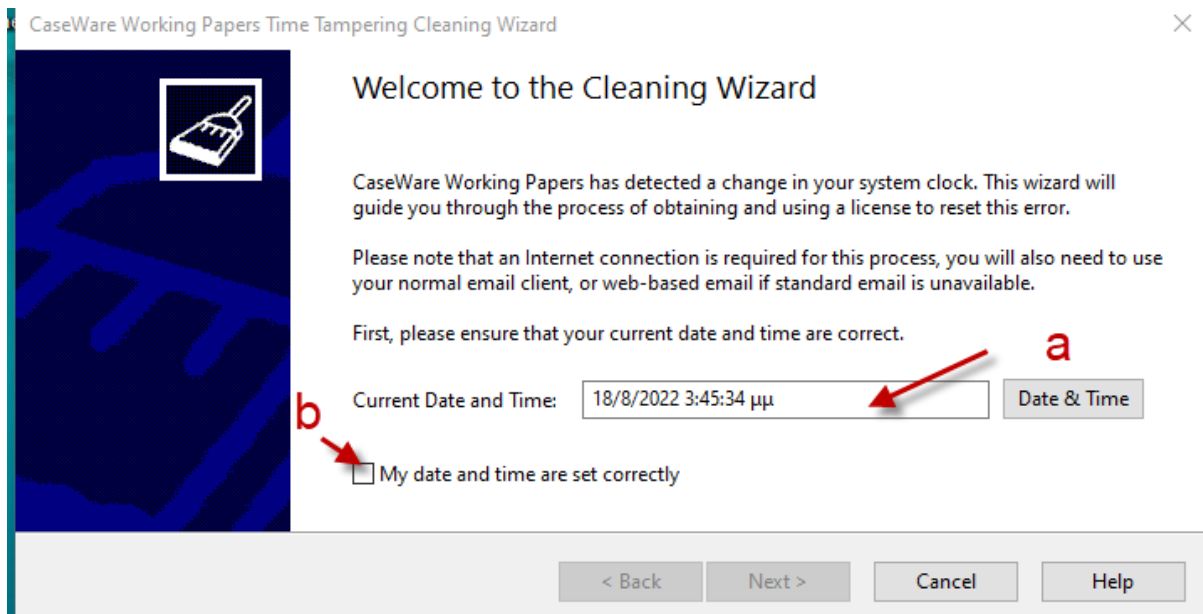

### Time Tampering

#### Purpose

The procedure describes the steps to correct a 'Time Tampering' incident. Time Tampering happens when the user has changed the computer date and tries to use Caseware Working Papers. **It is highly recommended not to change the computer date.**

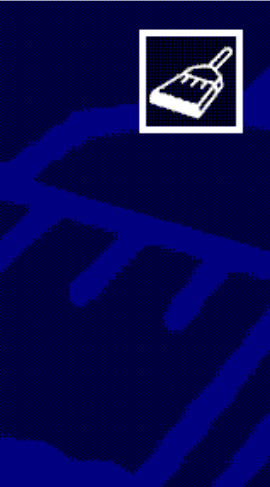

#### Steps

1. Once Caseware opens, the following window of the 'Cleaning Wizard' will appear.
  - a. Confirm that the date and time is correct. If not, correct it by pressing 'the date and time' tab.
  - b. Click on the box 'My date and time are set correctly'

2. Press Next on the window, which has changed

## Welcome to the Cleaning Wizard

CaseWare Working Papers has detected a change in your system clock. This wizard will guide you through the process of obtaining and using a license to reset this error.

Please note that an Internet connection is required for this process, you will also need to use your normal email client, or web-based email if standard email is unavailable.

First, please ensure that your current date and time are correct.

Current Date and Time:

My date and time are set correctly  
To continue, click Next.

3. Press next. The selection is 'Obtain Cleaning Licence'. Do not change it.
